PLUSZONE Began in Educational Settings

FROM CLASSROOM EXPERIENCE TO EDUCATIONAL PARTNERSHIP

PLUSZONE EDUCATION has developed through the two educators' many years of teaching experience and real interactions with students. They have explored educational methods that help students reflect, judge, and act independently.

Turning Classroom Experience into Educational Trust

Kim Kyeong-Hyi

· School Health Teacher
· Bachelor's Degree in Nursing
· M.Ed. in Educational Counseling

She is dedicated to addressing students' physical and emotional challenges in the health office, supporting self-reflection and positive behavioral change. She has practiced character education by listening closely to students' hearts and minds.

Kim Hye-Jin

· Elementary School Teacher
· M.Ed. in Educational Counseling
· Completed Doctoral Coursework in Education

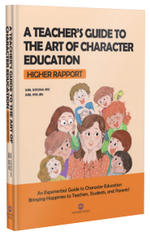

Based on her firsthand experience in implementing character education, her insightful observations offer refreshing solutions not only to students, parents, colleagues, and early-career teachers, but also to senior educators in the field.

EDUCATION KOREA 2027

EXHIBITION PARTICIPATION
We will be exhibiting at Education Korea 2027.
DATE Jan. 27 (Wed) – 29 (Fri), 2027
VENUE COEX Halls A & B, Seoul

Higher Rapport

Higher Rapport is a sustainable relationship of mutual growth. It redesigns how we view feedback, turning every stimulus into a learning opportunity and leading to shared growth.

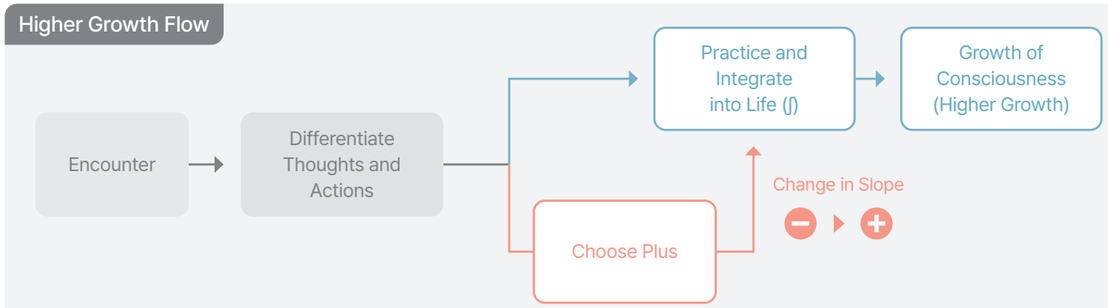

Higher Rapport Evolution Process ➔ The more you practice, the more your rapport evolves toward a higher level.

Higher Growth

When encountering an event or a person, reflect on (differentiate) whether your thoughts and actions in the moment are making a Plus choice or a Minus choice. If it is a Minus, convert it into a Plus and put it into practice—then your consciousness will grow to a higher level than before.

Higher Growth Flow

3S Questioning Method

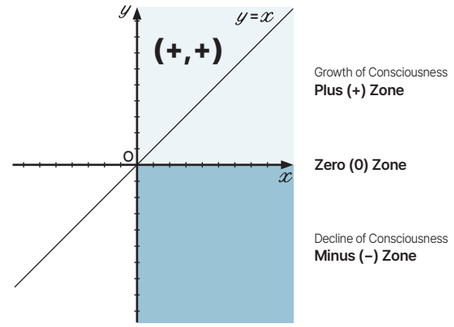

The 3S (3-Step) Questioning Method is a core approach in PLUSZONE EDUCATION, enabling you to see yourself objectively, clarify your direction, and take ownership of your life.

3S Questioning Practice

	Core Process	Question	Expected Outcome
STEP 1	Self-Reflection	"Why did I think and act that way?"	Discovering the root causes of unconscious thoughts and emotions
STEP 2	Setting Plus (+) Standards	"Are my thoughts and actions Plus or Minus?"	Reviewing my own standards and choosing the values to put into practice
STEP 3	Standards into Action	"So, what should I do now, and how?"	Naturally putting the chosen standards into action

The Coordinate Plane of Consciousness

The **x-axis** represents "action" driven by good thoughts, and the **y-axis** represents "consciousness" grown through those actions. Depending on the choices (+, −) you make in every encounter, your consciousness rises into the Plus Zone or falls into the Minus Zone.

Category	Key Traits	State of Mind and Behavioral Patterns
Plus (+) Zone	Truthfulness, honesty, sincerity, diligence, love, consideration, understanding, forgiveness, initiative, positivity, proactivity, creativity...	Wherever you go, there is a place to belong, and positive change begins right here. No matter how hard it gets, never go back to Minus—choose Plus again.
Zero (0) Zone	A state of neither love nor hate. A state of alternating between love and hate. No change (+1−1=0).	Good deeds without reflection leave consciousness unchanged. A single wrong choice can easily drop you back into the Minus Zone.
Minus (−) Zone	Lies, deception, laziness, hatred, resentment, complaining, complacency, negativity, arrogance...	Wherever you go, there is no place to belong, and even good opportunities that come your way slip away. Blaming circumstances ("I ended up like this because of that"), you keep choosing Minus.

* The Calculus of Life: Every momentary choice (dy/dx) accumulates (∫) to shape the trajectory of your entire life.
